SKILLS

HTML5 CSS3 JavaScript

jQuery Node.js Vue.js

React Redux PHP

Laravel TypeScript SASS

MySQL MongoDB Git

Cordova

LANGUAGES

Serbian

Native or Bilingual Proficiency

English

Professional Working Proficiency

PROFILE

Passionate about React/TypeScript and the power it offers with Redux, in love with pretty much everything about Tailwind!

With a strong background in backend technologies like PHP(Laravel, Drupal), Node.js & Express, and expertise in MySQL and MongoDB, I bring a comprehensive skill set. Proficient in both Windows and Linux and with some experience on macOS.

In addition to my work with vanilla JS, jQuery, Vue.js, Cordova, Nuxt, and Next.js, I am keenly interested in exploring the capabilities of SASS and the creative possibilities of CSS-only solutions.

I eagerly seek a dynamic and well-organized team where I can joyfully contribute my skills!

EXPERIENCE

React Developer at Mintly *9/2022–present*

- Working closely with designers, back-end and DevOps engineers on building a product for NFT/Crypto market and made sure that it met the market needs and stayed competitive
- Using React with Typescript, Redux(Thunk), RTL and Tailwind to build UI components and Solana transaction systems with NFT listings using Solana Wallet Adapter and Web3.js
- Creating Web3 login system that connected Twitter and Discord accounts with the user wallet and displaying the user data from the Twitter API
- Helping back-end team with the API and writing middlewares in Node.js & Express

React Developer at ChipstarsBet *10/2021–11/2022*

- Working closely with designer on rebranding and changing the whole looks of a web application based on React/TypeScript using React Query, MUI, SwiperJs, Mobx, FramorMotion, StyledComponents and testing with React Testing Library
- Creating PHP scripts for sending emails through contact forms
- Using i18n for internationalization of casino and Geo-blocking certain countries
- Creating static pages for SEO optimisation of Q&A, T&C and other pages in Next.js
- Building login/register system and an affiliates section of the application with affiliates register form and implementing an affiliate code mechanism for new users
- Dealing with queries and mutations to talk to server through GraphQL

PHP/Drupal developer at Fermicoding *05/2021–09/2021*

- Customizing and building Drupal modules and themes from scratch using PHP, CSS, JavaScript
- Building, setting up and deploying Cordova nautical application to Google Play and App Store that used Leaflet.js for showing maps and coordination
- Working with foreign clients on enhancing their products and satisfying their needs

Web developer at SM Agency(JavaScript, Vue.js, HTML5, CSS3) *11/2020–03/2021*

- Setting up JAMstack project on Netlify by writing YML files and building static pages with Nuxt.js to populate application with data from YML files and creating Vue components
- Building landing and static pages with Bootstrap 4 and JavaScript from Adobe XD designs
- Working with clients on satisfying their needs and implementing their designs

PROJECTS

React Google Maps App

React, TypeScript, React Google Maps package, Sass

GitHub project: <https://github.com/StefaNikolic018/google-maps-react-test>

React Weather App

React, TypeScript, ContextAPI, Axios, OpenWeatherAPI, StyledComponents, Sass, Charts.js

GitHub project: <https://github.com/StefaNikolic018/WeatherApp>

Live Project: <https://stefanikolic018.github.io/WeatherApp/>

React WebSocket Crypto App

React, TypeScript, ContextAPI, Axios, Tailwind, Bitfinex API

GitHub project : <https://github.com/StefaNikolic018/WebSocket-Crypto-Market>

TopSet Plus - Fishing equipment company

HTML5, SASS, JavaScript

GitHub project: <https://github.com/StefaNikolic018/TopSetPlus>

Live project: <https://topsetplus.com/>

E-index - graduation thesis

PHP, Laravel, MySQL, JavaScript, Bootstrap 4

GitHub project : <https://github.com/StefaNikolic018/E-indeks>
